RE: COVID-19 Update Glen Communications

Dear Family Members,

Last week through a service provided by the state of Louisiana, LSUHSC was able to test a total of 93 residents in Village Health Care for COVID-19. This was the first round of surveillance testing completed at The Glen. Within two days, The Glen received 89 results which showed one new positive case of the 93 residents who were tested. The results of four residents are still pending.

The resident, who lives in Iris House in Village Health Care with the positive case, has been relocated to an isolated area in Village Health Care and is receiving treatment. For any resident who tested positive, the responsible party was immediately made aware. Additionally, a staff member in Cypress House in Village Health Care has tested positive for COVID-19. The staff member is quarantined off campus.

The surveillance testing, headed by Dr. John Vanchiere, an infectious disease specialist affiliated with LSUHSC, allows for additional testing of residents throughout the remainder of the quarantine period. Staff members in Village Health Care will also be tested at a later date for coronavirus. For questions on testing, please refer to the FAQs page on The Glen's COVID-19 communication page on our website.

All of The Glen's COVID-19 communication is posted on our website at **theglen.org/resources-for-the-coronavirus**. For additional questions, contact The Glen at 318-798-3500.

Sincerely,

A handwritten signature in cursive script that reads "Debra Williams".
